Since 2006, the department was headed by oncurology National Cancer Center Ministry of Uzbekistan. In 2008, he defended his thesis for the degree of Doctor of Medical Sciences on the topic: "Surgical and physiological aspects of the choice of method of urinary diversion after radical cystectomy," the specialty 14.0014 - "Oncology". Results of the research activities in the field of oncurology received widespread introduction in oncurology not only in Uzbekistan, but also widely accepted in the countries of near and far abroad countries, the scientific and practical aspects of this work are included in the system of education in medical schools, at the Department of Oncology of the Tashkent Postgraduate Medical Education and the daily work of professionals oncurology. There was published more than 400 scientific papers, articles and abstracts in international and domestic journals by Professor M.N Tillyashaykhov. The invention protected by 5 patents, published 3 monographs and released to print more than 10 guidelines for practitioners, masters and clinical residents. He was a participant and speaker at numerous international forums and congresses held in Switzerland, the Netherlands, Italy and Egypt. He is one of the recognized world leader in reconstructive plastic surgery of the urinary system.

Since August 2010 he was appointed Director of the Republican Specialized Center of Tuberculosis and Pulmonology of Ministry of Health of the Republic of Uzbekistan, which is the leading agency for the organization of the specialized TB services to the population of Uzbekistan in the national, provincial, municipal TB institutions of the Republic of Uzbekistan. It is the main institution of TB services, providing organizational and methodological, diagnostic, counseling and medical help. National Program Manager of the

fight against tuberculosis, the project manager of the State Program on combating tuberculosis in Uzbekistan for 2011-2015. He was a chairman of the Scientific Council of the Republican Specialized Center of Tuberculosis and Pulmonology.

With the direct participation of Professor M.N. Tillyashaykhov prepared and adopted a National program to fight tuberculosis in the Republic of Uzbekistan for 2011-15, approved by the Cabinet of Ministers on March 5, 2011. Under the guidance of Professor M.N. Tillyashaykhov, in accordance with all the rules of medical special building fully constructed new buildings of Republican Specialized Center of Tuberculosis and Pulmonology meeting all modern international standards. Therapeutic and diagnostic department equipped with modern high-tech equipment. Preparation of communities - one of the essential measures to improve the quality of ongoing diagnostic and therapeutic services to the population. Following this principle, the majority of employees of the Center have been trained in foreign clinics and widely implement the acquired knowledge and skills to provide highly specialized care to the population of Uzbekistan.

In January 2016, Professor M.N. Tillyashaykhov appointed Director of the National Cancer Center, Ministry of Health of the Republic of Uzbekistan.

At present, the State has an attention to the further development and improvement of the activity of oncology services, the quality of provision of high quality care to the population of our country. This is due to the steady growth of cancer incidence and high mortality rates and disability population. In this connection, under the auspices of the Ministry of Health and the Cabinet of Ministers, with the active participation of Professor M.N. Tillyashaykhov finishes work on National cancer Control Program for the 2017-2021 years. Basic concept is the combination of our own experience of Uzbekistan and international experience in the organization of programs for early detection and screening of cancer, equipping departments of oncology service in modern high-tech equipment and medical supplies for the provision of qualified medical and diagnostic services to the world standards. The great importance is attached to train and retrain of personnel with oncology service compulsory education in major international cancer center. The concept covers almost all aspects of cancer control high, with the active involvement of citizens, governments, and the media, as well as primary care physicians from all regions of our Republic.

Professor M.N. Tillyashaykhov is a member of many international organizations such as ESMO (European Society of Medical Oncology), ASCO (American Society for Clinical Oncology), ROOU (Russian Society of Oncology), ESO (European School of Oncology), ADIOR (Association of Centers of Directors and the Institute of Oncology and Radiology of the CIS and Eurasia), and International Union against Tuberculosis and lung disease (France).
